

FUCKCOIN

WHITEPAPER

V1

chaper 1: Introduction

A true OG memecoin

“A memecoin before its time”

The fuckcoin idea was developed way back in early 2014, making it one of the oldest ever memecoin projects. The initial plan was to create a forked token, but the plans halted shortly afterwards due to various complications. Since 2014 the OG @Fuckcoin project has been sitting dormant waiting for its time to shine.

The meme “Fuckcoin” has a clear yet simple ethos. “Fuck”

Our two stickmen really like to fuck & they love nothing better than to give a fuck.

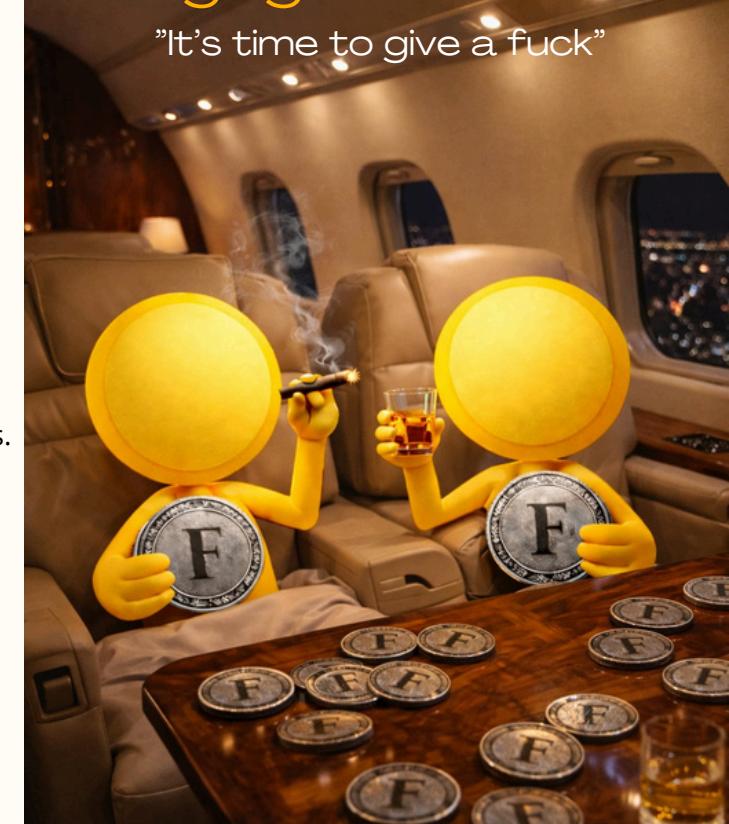

“Send digital
fucks to friends
& family”

chaper 2: The Rebirth

Bringing back an OG

“It’s time to give a fuck”

Roll on November 2025 & the OG Fuckcoin project was stealth launched on Pump.fun with ZERO insiders. Despite some initial market FUD, the project launched successfully quickly shooting to a \$1.7M marketcap before finding a very modest floor price around \$70k at time of writing.

Bringing back the OG means exactly that, The memecoin that was created long before Solana or even Ethereum is coming back using the full OG narrative. Thats right! The same OG logos, same OG website, Same OG social media. We are also mixing 2014 with a modern twist, Bringing fucks into this memecoin generation.

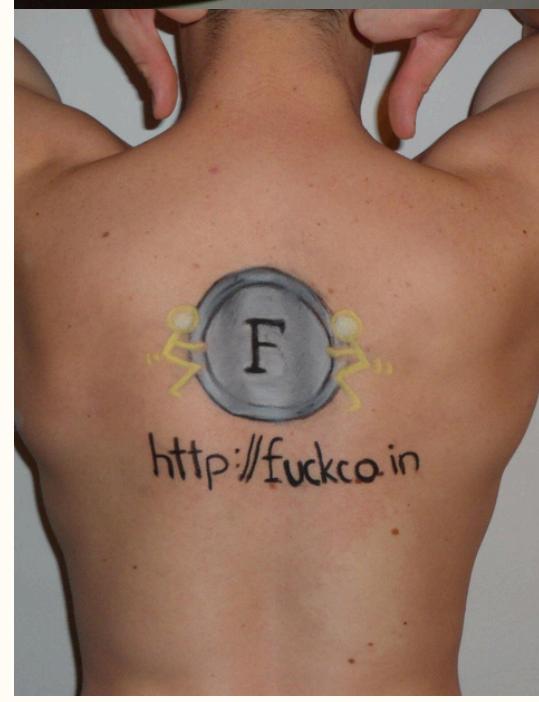

chaper 3: KOL'S & Advertising

2014 meets 2026

The fuckcoin marketing strategy is completely unique & unlike anything in todays market. We will stick with the OG 2014 guerilla style marketing offering holders perks & rewards for sharing our printable "fuckcoin flyers" all around the globe. In honor of the OG idea, we will also be hiding paper wallets containing digital fuckcoins... More coming soon!

This will also be combined with some more modern KOL marketing, working with carefully selected partners & trusted people to help push & drive the project to new heights.

chaper 4: The Merch Complimentary gifts

This chapter will offer holders various types of fuckcoin merch, from basic to unique! We are going to offer some paid & complimentary (YES FREE) merch to our loyal holders.

Our initial merch will include the following:

- T-shirts
- Stickers
- Custom Fuckcoin Condoms. (Had to be done)
- Neon fuckcoin lights
- Car Stickers
- Fuckcoin pens & more

chaper 5: The Exchanges All eyes lead to Fuckcoin

As our Market cap continues to grow & holder numbers increase, our next major milestone will be securing major tier 1 & Tier 2 exchange listings. Yes TIER 1. Whilst we firmly believe everyone should be holding Fuckcoins in their own wallets, we fully understand the importance of getting "Eyes on the project" Despite this being a focus for chapter 5, We have already opened discussions with a number of potential exchange partners about future listings.

DO YOU GIVE A FUCK?

chaper 6: THE BONUS FCKS

DEV buybacks

As you might have noticed already, The Fuckcoin DEV is doing serious buybacks. More than \$30,000 in just over 60 days & this will continue.

Fuckcoin Burns

2% of the entire supply has been sent to the burn wallet already. No further burns will take place as the shift is now turning to locking & using buybacks for marketing. We believe this has more upside to burning

Fuckcoin Locks

We are showing we give a fuck & we really mean it. A total of 6.5% of all fuckcoins are currently locked. Thats a whopping 65,000,000 fuckcoins off the market.
